Education

SCTR's Pune Institute of Computer Technology, Pune
Bachelor of Engineering in Information Technology

CGPA: 9.375
2023 – 2027

Babasaheb Utangale Jr. College, Akola
XII (12th Grade)

Percentage: 77.8%
2021 – 2023

Experience

Ajinkya Infotech

Software Engineering Intern

Remote

Jan 2026 – Mar 2026

- Contributed to **backend development** of their platform, enabling reliable and efficient system communication.
- Developed and deployed a **multilingual AI chatbot**, enhancing user interaction and enabling dynamic multilingual real-time responses across the platform.
- Performed comprehensive **end-to-end API testing** and debugging, ensuring robustness, correctness, and seamless integration of backend services.
- Identified and resolved a **critical backend integration issue**, successfully restoring chatbot functionality and improving overall system reliability.

Projects

TruthLens | AI Hallucination Detection System | FastAPI, LLMs, Wikipedia, SerpAPI

- Developed a **real-time AI hallucination detection system** to verify AI-generated content across platforms.
- Built a **Chrome Extension** with inline claim verification and popup-based analysis.
- Designed a **5-layer backend pipeline** for **claim extraction**, **evidence retrieval**, and **LLM-based accuracy evaluation**.
- Integrated **Wikipedia & SerpAPI** and an **analytics dashboard** for verification metrics, pipeline insights, and latency tracking.

Codeon | AI Powered Repository Intelligence | Spring Boot, PostgreSQL, Redis, JGit

- Building a **real-time repository intelligence platform** using Kafka to stream **AI insights** via SSE.
- Developing a **natural language query engine** for **contextual codebase analysis**.
- Architecting a **high-performance ingestion pipeline** using JGit and GitHub APIs to analyze **repositories at scale**.
- Implementing **Tree-sitter based function tracking** and **Redis** caching to accelerate repository analysis and **reduce LLM overhead**.

Technical Skills

Languages: C++ | SQL | Java

Core: OOP | DSA | DBMS | OS | CNS

Databases: PostgreSQL | Redis

AI: AI Models | RAG pipelines | API calling | AI Chatbots | Prompt Engineering

Tools: Docker | Github | Antigravity

Achievements

- Secured **1st Place** at **JOSH Softwares Hackathon'26**.
- Ranked **Top 100** in Google's **genAI Exchange** Program hackathon'25
- Rank 44** by accuracy in Bajaj Finserv **HackRx'25** hackathon, out of 10000+ teams.
- Awarded **NMMS Scholarship (2018)** for academic excellence at national level.

Extracurricular

- Nominated for **VCA Cricket Team** trials.
- Served as **NCC Sergeant**, leading and coordinating activities for **60+ cadets**.
- Active member of **PICT NSS** and **PICT ACM Club**.
- Photography enthusiast passionate about capturing nature and candid moments.
